MONTHLY SPECIAL

OCTOBER 7-13
IS
FIRE PREVENTION WEEK

LOOK. LISTEN. LEARN.
Be Aware. Fire Can Happen Anywhere.™

Why do we observe Fire Prevention this week?

Fire Prevention Week has been sponsored by the NFPA since 1922 and was made a national observance by President Calvin Coolidge in 1925. It is observed each year during the week of October 9th in commemoration of the Great Chicago Fire. The fire began on Oct 8, 1871 and caused devastating damage which destroyed more than 17,400 structures, killed 250 people, left 100,000 homeless and burned more than 2,000 acres of land. To find out more about Fire Prevention Week, click the link below to visit the NFPA's website to learn more live saving tips and information.

WHY YOU SHOULD MAINTAIN YOUR FIRE ALARM SYSTEMS

The two most important reasons for maintaining your fire alarm system are Life Safety and Avoiding Violations. If you are a property manager or building owner, maintenance and testing of the life and property safety systems should be done periodically to ensure they are functioning properly. A contractor who specializes in these systems, like Briscoe Protective Systems, can maintain & test the system. If any problems are found, repairs need to be done as soon as possible to ensure the system remains fully functional. Inspection Reports will be provided to the building or property owner to show proof of when the inspection was done and what the outcome was including any repairs or explanations of what had to be repaired. Maintaining your buildings save lives and money.

HIGH-RISE APARTMENT & CONDOMINIUM SAFETY

People living in a high-rise apartment or condominium building need to think ahead and be prepared in the event of a fire. It is important to know the fire safety features in your building and work together with neighbors to help keep the building as fire-safe as possible.
