

FIRE SAFETY CHECKLIST

PLEASE CHECK OFF SAFETY ITEMS YOU FOLLOW:

- ☐ Are your smoke detectors being cleaned by a licensed professional as required by code?
- ☐ Is your fire alarm system being inspected by a licensed professional as required by code and most insurance regulations?
- ☐ Does your building have Carbon Monoxide detectors that meet code requirements?
- ☐ Does your staff understand how your fire alarm system works and do you have a certified person on staff as per certain codes?
- ☐ Do you have central station monitoring?
- ☐ Are your fire extinguishers up to date?
(Should have a date stamped that is less than a year old)
- ☐ Are the fire extinguishers mounted properly and free of obstructions?
(Should be between 4" and 60" from floor and nothing within a 36" radius of the extinguisher)
- ☐ Do you have an adequate number of fire extinguishers?
(They should be placed so travel distance does not exceed 75 feet or where there is a significant hazardous area to protect such as kitchens)
- ☐ Are employees aware of the location of fire extinguishers and exit doors?
- ☐ Are pull stations free from obstruction and mounted at the proper height and distance from paths of egress?

Any unchecked boxes indicates an area of fire safety that needs to be addressed, any boxes checked indicates a positive, fire-safety situation.
